

Jonathan Paul[®]
FITOVERS

2018/19 | PRODUCT CATALOG

Founded over 20 years ago in Australia, Jonathan Paul Fitovers Eyewear originated as a solution to the intense Australian sun. Effective, comfortable, and affordable, this revolutionary fashionable, and functional “fitover” sunglass with its innovative wrap-around styling quickly caught on.

Over the years, Jonathan Paul has earned a reputation of designing the very best fitover sunglasses, complementing stylish frames with performance optics and an optimal fit, all the while maintaining an unwavering focus on the needs of the prescription eyewear user.

Fast forward to 2018, Jonathan Paul Fitovers Eyewear continues to lead the charge. This year, we’re excited to introduce our most innovative model line to date, with new frame designs to support our ever-expanding product collection – continuing to set the standard in delivering optical versatility and on-the-go, lifestyle performance.

The Jonathan Paul Difference – Why our fitovers are the superior choice

POLARIZED, POLYCARBONATE LENSES

- Eliminates glare and provides 100% protection from harmful UVA and UVB rays
- Offers natural color definition, superior visual acuity and enhanced contrast

SUPERIOR OPTICAL QUALITY

- Injection molded lenses
- POLARVATION™
- POLARVUE®
- DUO HARDCOAT®
- FLASH REFLECT®
- REEZIST™

Learn more about Jonathan Paul Fitovers' superior lens technology on pp 29-30

TR90 FRAME MATERIAL

- Lightweight and resistant to stress cracking and material fatigue
- Unparalleled richness of color and finish, preserving a quality appearance for longer

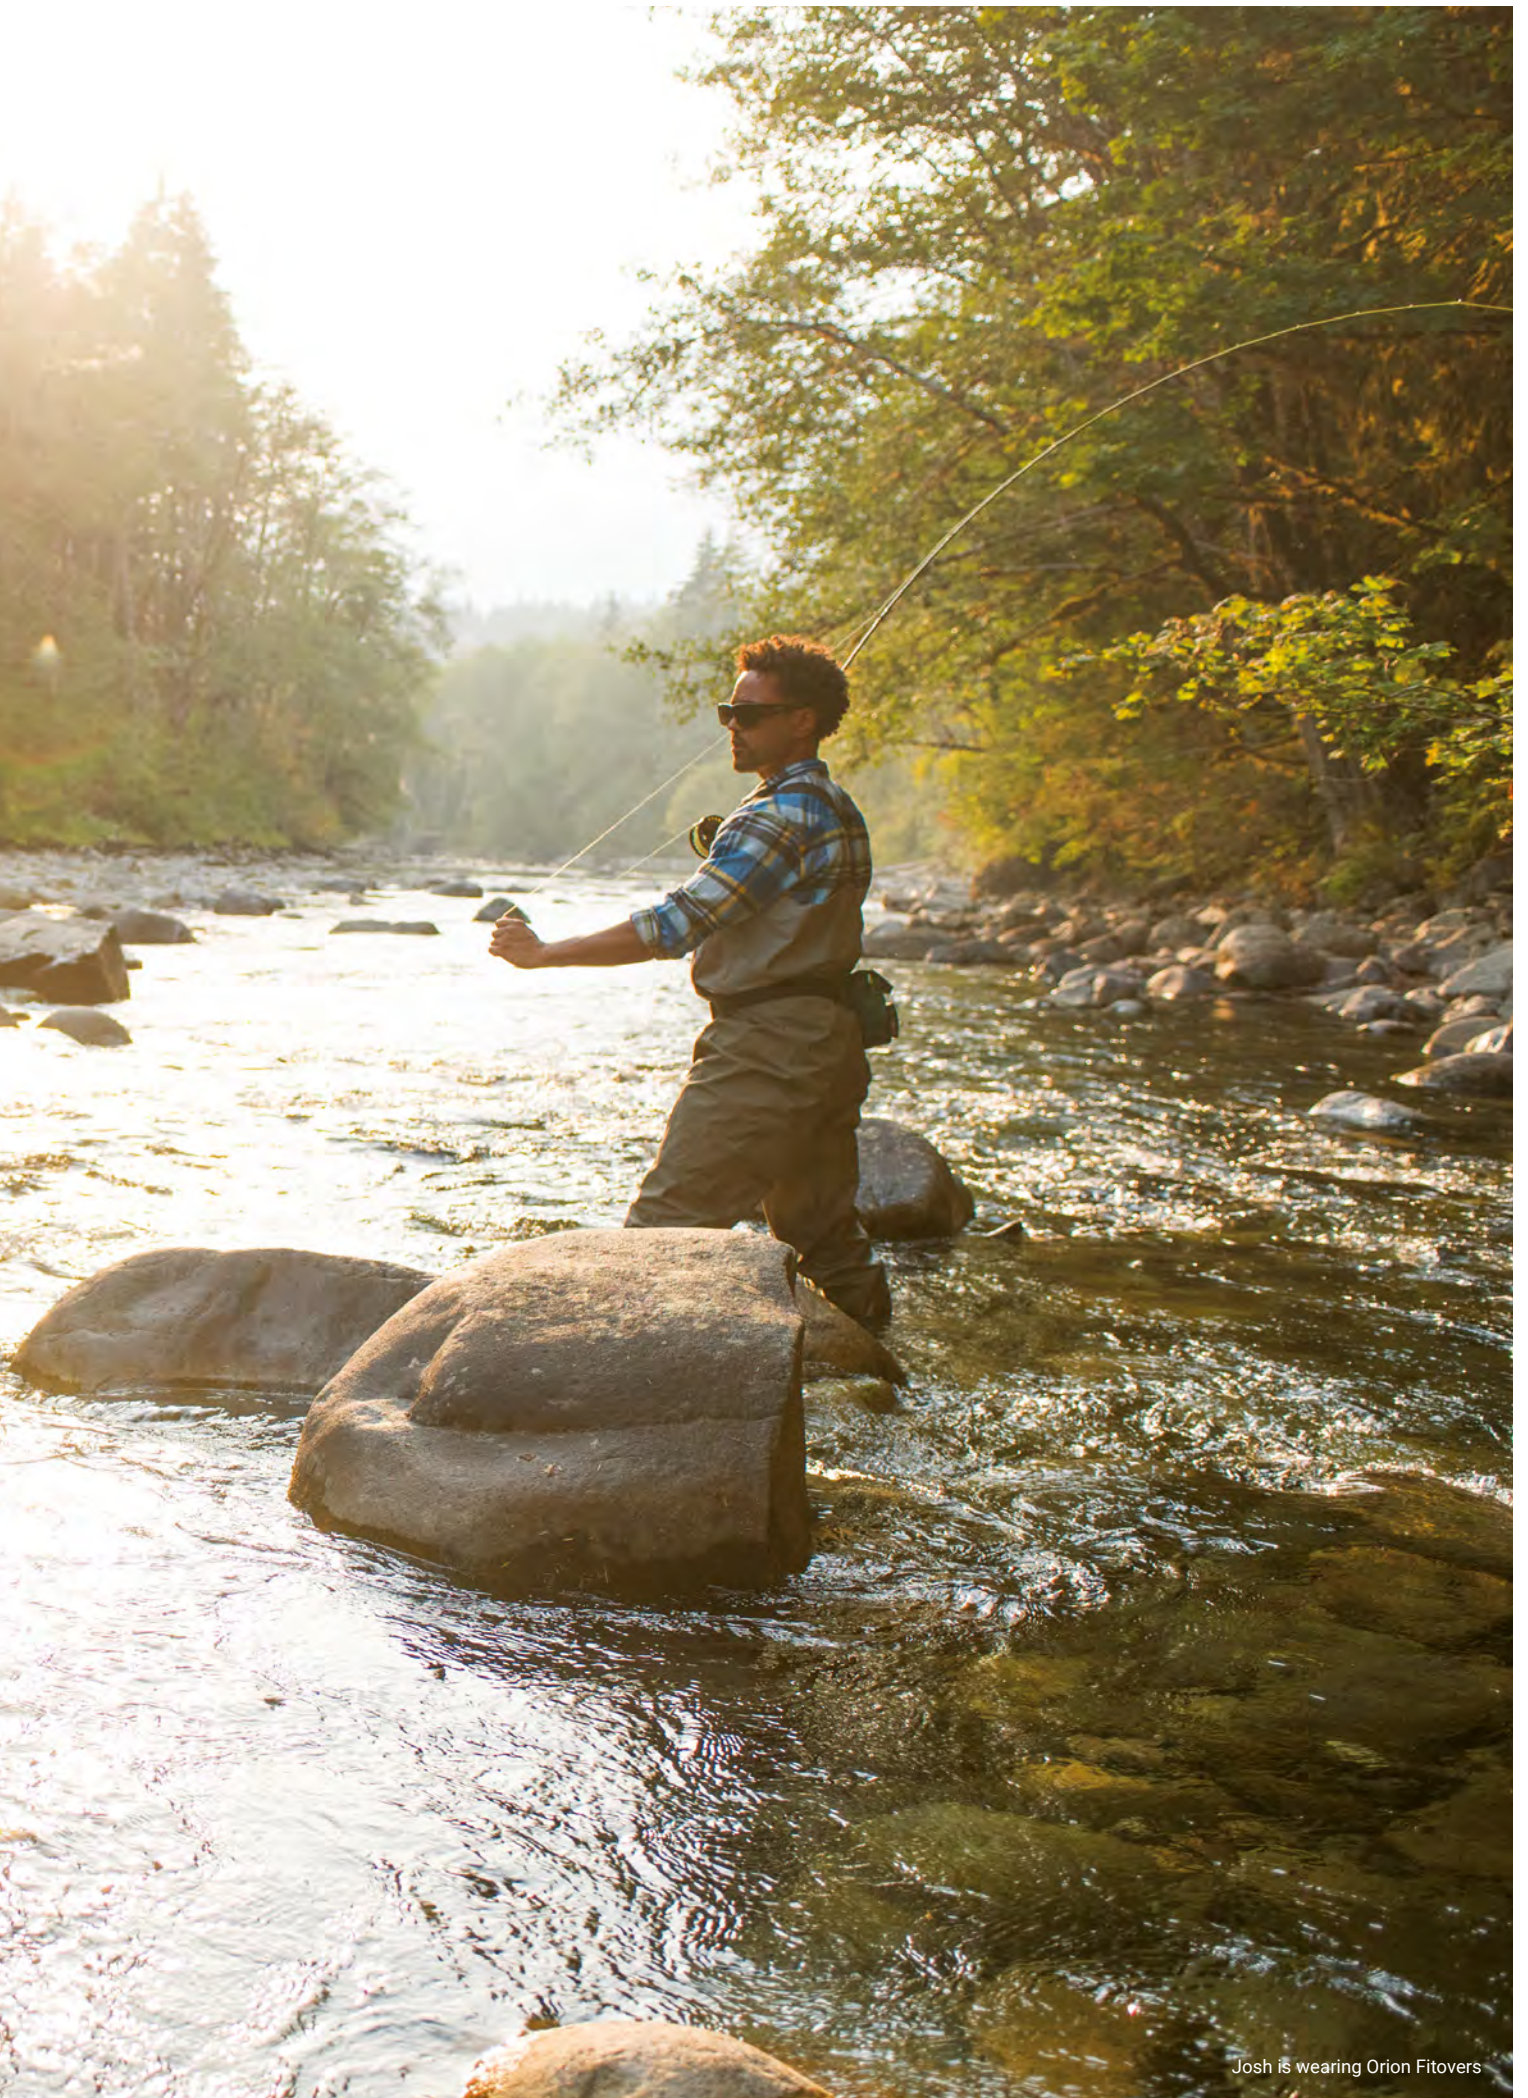

SCOUT FIT TEMPLES

- Designed to wrap around the back of the head while not interfering with prescription glasses
- Our exclusive Scout Fit Temple design never needs readjusting and avoids unnecessary added pressure on the ears

Optical Versatility. On-the-Go, Lifestyle Performance

Josh is wearing Orion Fitovers

Finding the PERFECT FIT

We understand all too well the importance of optimal frame fit when pairing with your existing prescription eyewear, particularly in striving to get the most out of your day, whether around town, in the outdoors, or anywhere in between.

We designed our Comfort Fit Chart and Online Fit Guide to remove the guesswork and ensure you find the perfect fitover frame style each and every time.

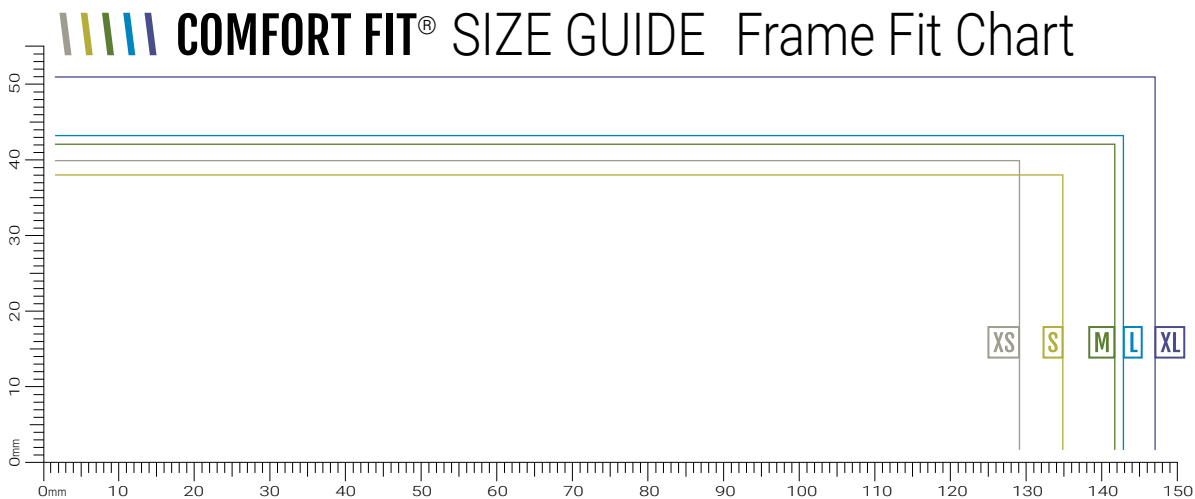

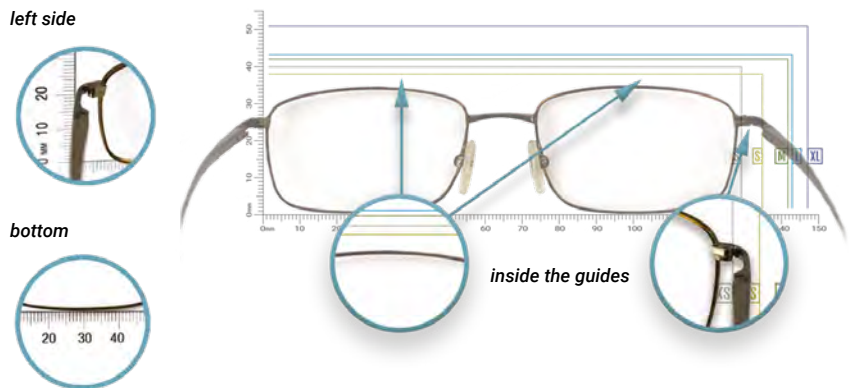

COMFORT Fit Chart

Use our proven Comfort Fit Chart to find your perfect frame size

How to measure your frames

1. Line up the **left side** and **bottom** of your frames to the guides on the fit chart
2. If your frames lay inside the guidelines for each size, they will fit that size.

If your frames lay outside the guidelines for a particular size, they will not fit and you'll need a larger size.

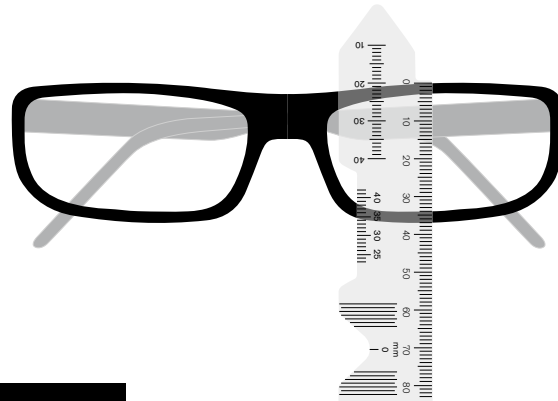

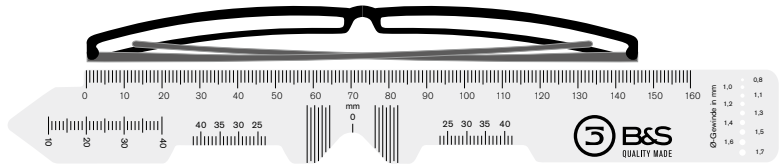

Quick List >>>	XS	Glides Coolaroo	S	Nowie Aurora Binya Razor	M	Element Lotus Kiata Queeda	Sabre Dahlia Ikara Chic Kitty	L	Aria Jett Pandera Quamby	Neera Traveler Orion Ogee	XL	Allure Aviator Yamba
----------------	-----------	--------------------	----------	-----------------------------------	----------	-------------------------------------	--	----------	-----------------------------------	------------------------------------	-----------	----------------------------

ONLINE Fit Guide

Go to [Fitovers.com/whatsmysize](https://fitovers.com/whatsmysize)

This time-saving tool takes the guesswork out of finding the perfect fitover frame.

1. Measure the outside height and width of your Rx frames with a ruler.
2. Enter the measurements into the form fields of the online fit guide.
3. Click "Find Matches"
4. Confidently shop the curated assortment of compatible Jonathan Paul Fitovers selected for you.
5. Better yet, try them on using our revolutionary Virtual Try-On experience and find the perfect frame to match your individual style.

Jos is wearing Yamba Fitovers

TIP

For the best fit, choose a fitover frame that is *slightly larger in width and height* than your prescription frame measurements. For the most optimal results, our **WHAT'S MY SIZE** tool on fitovers.com is designed to display compatible frame results from closest fit on the top, to widest fit on the bottom, with a 5mm variance.

POLARVUE® Polarized Polycarbonate Lenses

Jonathan Paul lens technology features patented POLARVUE® and POLARVATION™ which is proven to reduce glare more than traditional, non-polarized lenses. The injection-molded polycarbonate construction has been engineered to match your optics to your environment. Maximize performance by choosing the perfect balance of light transmission in a stylish, lightweight and durable frame.

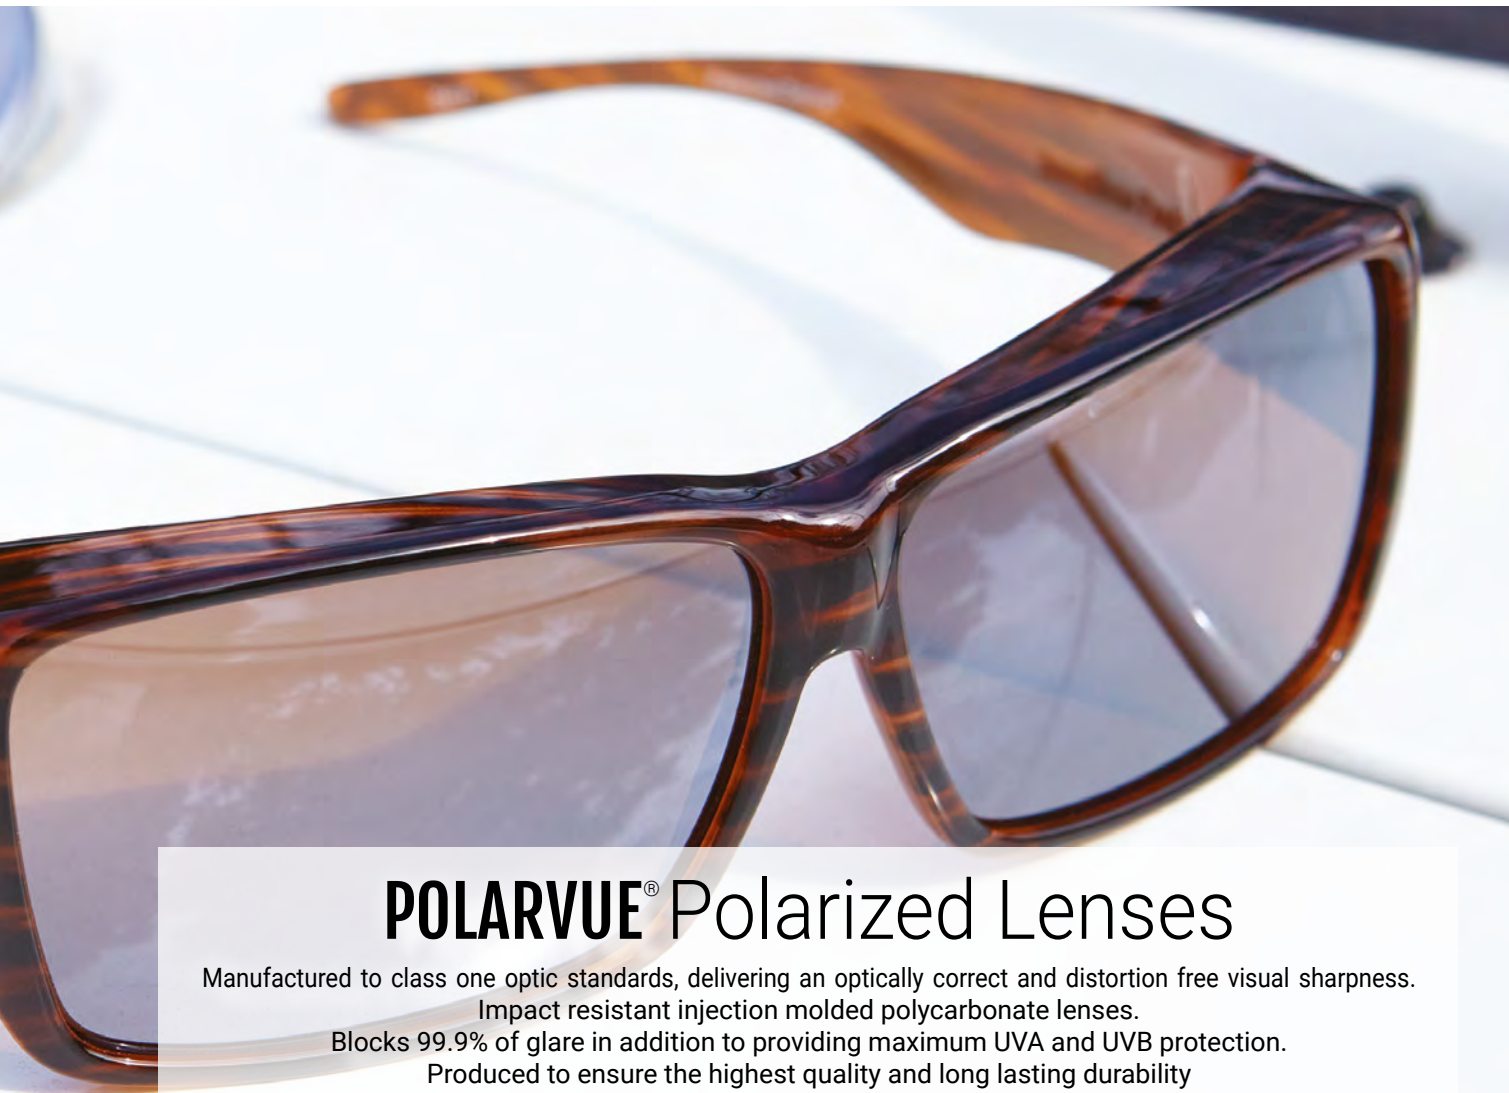

polarizing element has a greater than 99% polarized efficiency rating and is encapsulated between the POLARVUE® lens material while only 20 microns thin.

lens construction is the exclusive and proprietary core of our lens technology.

offers two levels of protection against scratching by including a hard coat treatment on both the front and back surfaces of the POLARVUE® lens material.

subtle flash silver mirroring adheres to the front of the lens, reflecting additional harmful glare while cosmetically hiding prescription eyewear behind the sunglass lens.

anti-smudge coating protects and shields from all elements that might come in contact with the lens: dust, water, fingerprints, smudges, and more!

POLARVUE® Polarized Lenses

Manufactured to class one optic standards, delivering an optically correct and distortion free visual sharpness.
 Impact resistant injection molded polycarbonate lenses.
 Blocks 99.9% of glare in addition to providing maximum UVA and UVB protection.
 Produced to ensure the highest quality and long lasting durability through multiple manufacturing processes and treatments.

POLARVUE®	UV400 BlueLight Filter	Reflected Glare Block		Tv	Best Uses
			Tint & Color		
G  Grey (flash reflect)	89.88 % blue light between 400 & 500nm	99,9 %	medium to dark grey	9.64 % visible light pass through	colors seen in most natural state
A  Amber (flash reflect)	96.72 % blue light between 400 & 500nm	99,9 %	medium to dark brown/yellow	10.16 % visible light pass through	bright sunny days and overcast conditions
Y  Yellow* (non-mirrored)	91.51 % blue light between 400 & 500nm	-/-	medium yellow	30.75 % visible light pass through	high contrast in low light, ideal for 90% of all eye disorders * Non Polycarbonate TAC lens
POLARVUE® HD					
PM  Purple Mirror	88.97 % blue light between 400 & 500nm	99 %	medium dark grey + purple mirror	10.52 % visible light pass through	high glare and bright colors
BM  Blue Mirror	92.12 % blue light between 400 & 500nm	99 %	medium dark grey + blue mirror	10.63 % visible light pass through	high glare and bright colors
GM  Green Mirror	86.37 % blue light between 400 & 500nm	99 %	medium dark grey + green mirror	10.72 % visible light pass through	high glare and bright colors
